

Luxsensor LS01

Alfa LMS outdoor lighting control system

Description

Alfa LMS is a modern street and city lighting control system, as well as lighting of industrial facilities and other areas where the use of lighting equipment involves significant energy consumption. The installation of the Alfa LMS at the site does not require a complete upgrade of the lighting system. For data transmission within the Alfa LMS using the power network to exchange data between the controllers in the system. Alfa LMS allows to realize such functions as monitoring of the condition of luminaires and other components in the system, remote control of luminaires, collection and processing of statistical information, notification of the occurrence of alarm events in the system, creation of a dynamic schedule for automatic operation of the lighting system and much more. You can control the lighting system and learn about its state from anywhere in the world.

Installation

The components of the outdoor lighting control system are mounted in the control panel on a DIN rail.

Package

All components of outdoor lighting control system are delivered as separate items in individual packaging.

A	Length	95 mm
B	Width	60 mm
C	Height	35 mm

Technical features

1	Article no.	4911006130
2	Electromagnetic compatibility (EMC)	No
3	Ingress protection (IP)	-
4	Climate application	CIm App1
5	Power compatibility	0 W
6	Housing color	-
7	Electrical shock protection	I
8	Energy efficiency class	-
9	Rated voltage	230 V
10	Ambient temperature	-40 to +40 C
11	Warranty	36 months
