

## WASHLINE LED

Floodlights for complex-shaped facades

### Description

WASHLINE LED is a series of professional architectural luminaires that designed for linear facade lighting. Efficient optics, adjustable bracket with a locking system, and a range of length and power levels make it possible to achieve flexibility, quality light, and efficiency in any lighting design.

### Installation

Luminaire shall be fixed at the surface.

### Design

Housing is made of aluminum. The LED module is located inside the housing.

### Optical part

Tempered glass diffuser. Beam angle: 15, 30, or 60 degrees. To be used as a floodlight for walls or architectural ensembles.

### Usage

Architectural lighting

Cultural and entertainment facilities

HoReCa / hotels / restaurants / cafes

Hypermarkets-/supermarkets

Mall
